Strips

## Treatment Procedures

### To Unplug Emitters

Inject Line Blaster at the rate of 1:6,000 using Line Blaster, Gator XL Proportional, or other reliable injector. Start irrigation system and fill lines completely. Inject Line Blaster for ½ to 1 hour. Shut system down and allow contact time of 8 to 24 hours. Longer injection time and longer contact time will give quicker results. Repeat 2-4 times until clean.

### To Prevent Plugging from Occurring

Inject Line Blaster at the rate of 1:6,000 using Line Blaster, Gator XL Proportional, or other reliable injector. Start irrigation system and fill lines completely. Inject Line Blaster for ¼ to ½ hour. Shut system down and allow contact time of 8 to 24 hours. Longer injection time and longer contact time will give quicker results. Regular treatment will keep the irrigation system clean.
