

The Essentials of Line Blaster

Unplugs Micro Irrigation Emitters & Cleans Up Nurseries & Greenhouses

What Line Blaster Does

Line Blaster removes blockages in micro irrigation systems. Line Blaster is the only product we know of that will unplug blocked emitters. Line Blaster is injected at the rate of 1:6,000 for 15 minutes per zone. (One gallon of Line Blaster per 6,000 gallons of irrigation water.) Allow contact time of 4-8 hours (or overnight). No flushing or intensive labor required. Repeat 2-4 times and the emitters will be open. Use every few weeks to keep the emitters clean.

Another side benefit of using Line Blaster through the irrigation system.

Will Line Blaster Hurt My Plants?

Absolutely Not. Line Blaster is safe to spray on all plants. We have tested Line Blaster at 30 times the dosage we are recommending and have had no ill effects. Customers have accidentally overfed Line Blaster at extremely high dosages without harming any plants. We have a customer that sprays Line Blaster on sprouts without harm.

How to Inject Line Blaster

Inject Line Blaster using the Line Blaster Injector or a proportional injector like the Gator XL. Line Blaster is not required to feed all the time. Use occasionally to clean the emitters and nursery. Use Line Blaster on a regular basis to keep it clean. Line Blaster is easy to use and it is safe.

1:6,000

Gator XL Proportional Injector

Using a proportional injector is simple. To get the 1:6,000 ratio, dilute Line Blaster at 1:60 and inject at 1:100. Mix Line Blaster at the rate of 1 pint per 5 gallons of water. Mix only the amount of water that will be used in a 24 hour period. Line Blaster works while you go about your normal work.

What if I only Need Line Blaster in Certain Zones?

Use our All Zones Controller along with the Line Blaster Injector and you can inject into just the zones you chose. The sprinkler controller turns on the Line Blaster Injector for just the zones that you program. Select-A-Zone is available in 6, 12, & 18 zone models. Line Blaster Injectors are available in 10,17, 22, 40, 85, & 170 gpd. Select the proper injector based on flow rate.

What is in Line Blaster?

Line Blaster is made up of stabilized peracetic acid. It is a weak organic acid that will not change the pH of the irrigation water. Line Blaster will not leave any chemical residue. When Line Blaster breaks down, it is water and carbon dioxide. Line Blaster is 100% active and much more concentrated than any other product on the market. Line Blaster is the only product that we know of that will remove blockage in irrigation systems.

Line Blaster Powder

Line Blaster Powder is excellent for quick spot cleaning of floors. Wet floor, sprinkle Line Blaster Powder over area, and watch it take off working. Line Blaster Powder is 27% Line Blaster on a soda ash base. Due to a elevated pH, Line Blaster Powder is not recommended for direct contact with plants.

How is Line Blaster Packaged?

Line Blaster Liquid

4x1, 5, 15, 35 & 55 Gallon Containers

Line Blaster Powder

50 # and 4x8# Containers.
